

UP transforms what the general public throws into the garbage and creates unique home wares, accessories and lighting from the junk heap of the dirty south.

Examples of rubbish used - light bulbs, mardi gras beads, liquor bottles, old vinyl LP's, plastic toys and baby bottles, blue roof tarp, MRE bags, rags, china, cable wire, salvaged wood, kitchen utensils, etc...I think it would be easier to name what we don't use...nothing!

A common comment made about ourselves is that Mark can put a light bulb in to just about anything and Heather can probably make a clock out of everything...
